PROJECTS

Radiant Academy — February 2022 - Running — Live — Client

It's a team project, I'm working here as a front-end developer. I developed Almost 65% of the front-end in this project. I also work on some functionality.

- We have core features like Forum, Quiz & Course.
- You can make a Video Call & can Code on Playground. We have a voting system for upcoming courses and also have a dark mode.
- We have a secured dashboard for users and admin separately. Users can add/delete posts and can see the analytics such as Like & Comments. Admins can manage users, posts, courses, quizzes etc.
- Developed a secure login system by firebase authentication.

Technologies: Next.js, Redux, TailwindCSS, Firebase, Mongoose, MongoDB, Paypal, Vercel, Axios, Redux-Toolkit, and various npm packages.

Smart IT Firm — December 2021 — Live — Client | Server

- Maintained a secure specific dashboard for customers and admin.
- Implemented special features like add, delete, update services, and update order status.
- Developed a secure login system by firebase authentication.

Technologies: React, Node js, Express js, Firebase, Heroku.

Oronno Opticals — November 2021 — Live — Client | Server

- Maintained a secure specific dashboard for customers and admin.
- Using MongoDB and Nodejs, created admin-specific roles to allow administration.
- Implemented special features like add, delete, update services, and update order status.
- Developed a secure login system by firebase authentication.

Technologies: React, Node js, Express js, Firebase, Material-UI, Heroku.

EDUCATION & COURSE

- **Complete Web Development Course - Programming Hero.** (July 2021 - February 2022, Running)
- **Diploma-in-Engineering** in Computer Technology - **Shyamoli Ideal Polytechnic Institute**. (2018 - 2022, **Running**).
